Coronavirus Update

Date – 27th October 2020

BHUTAN

Bhutan has successfully managed to control the number of cases as they followed strict lockdown rules. The coronavirus case count in Bhutan now stands at 342 cases, with 307 recovered, according to latest health ministry figures.

The good part is that there's no evidence of community transmission and no death is reported due to the virus so far.

Bhutan is operating limited flights over Air Bubble agreements between Bhutan & India. Bhutan is in talks with Thailand for resumption of international flights under bilateral air bubbles agreement as well.

The arrangement allows operations of flights between the two countries (India & Bhutan) under restrictive conditions like maintaining mandatory 21 days quarantine for all travelers upon arrival in Bhutan.
