

Coronavirus Update

Date – 03rd June 2021

BHUTAN

In the last two weeks, the number of Covid-19 cases has rapidly increased. Trashigang and Samdrup Jhongkhar are current Covid-19 hotspots.

Phuentsholing, Samdrup Jhongkhar, and parts of Trashigang are still under partial lockdown due to their proximity to India's borders.

Bhutan received 5850 Pfizer doses from US in May and will most likely be given to the younger population who have not yet been vaccinated.

Bhutan is awaiting their second dose of the Astrazeneca vaccine, to achieve full immunization.

According to the latest health ministry estimates, the number of coronavirus cases in Bhutan is now as follows.

Overall Data (Updated on 03rd June)

Total Cases	Infected	Recovered	Deaths
1639	330	1308	1

Bhutan will reopen only after a successful immunization campaign, which is now under progress. The officials hope to begin welcoming tourists from September-December this year, depending upon completion of immunizations.
