

## Coronavirus Update

**Date – 6<sup>th</sup> October 2020**

### **SRI LANKA**

Months after successfully managing to avoid the spread of the virus, Sri Lanka health authorities has identified sudden spike in Covid-19 cases whose source remains unclear, raising questions over possible community.

The coronavirus case count in Sri Lanka now stands at 3979 cases, with 3266 recovered according to latest health ministry figures. 13 deaths are reported due to the virus.

Majority of new cases are from the north-western side of the island and Government is taking all precautionary steps to avoid its wide-spread.

Resumption of regular international flights will depend on the virus situation in Srilanka in upcoming days.
