

## Coronavirus Update

**Date – 11<sup>th</sup> December 2020**

### **SRI LANKA**

Months after successfully managing to avoid the spread of the virus, Sri Lanka is in bit of little trouble as there have been sudden spike in Covid-19 cases.

They are having a head count of 700 to 800 patients per day. As a nation they are in operation except for few areas in the island which are still on lockdown.

The good news is that the government is considering opening the Bandaranayake International Airport in accordance with COVID 19 guidelines. This is more likely to happen in January 2021, once they have the approval from Health ministry.
